

THE EMPRESS EXPRESS

VOLUME XV, No. 32

EMPRESS, ALTA. THURSDAY, Jan 5, 1928

Price: \$2.00 Per Year

United Church

Uhah School, 2.00 p.m.
There is value in a good resolution—better to resolve and fall than never to resolve at all. How about a better record than ever in attending the church school and public worship?

Public worship, 7.30 p.m.
To many this is the best hour of Sunday it should be a helpful hour to all.
You are invited to attend our services.

The choir will lead in the singing. Music: Sanctus.
Anthem: "Abide With Me."
Rev. N. W. Whitmore, Minister.

Hal's Ditty

"One there was a merdener with yeller eyes. And his wife said to him: 'If you me do, me you will be hanged.' And he was hanged on Tuesday next."
—Literary Times.

The alphabet runs from A to Z, but Henry Ford's runs from T to A.

Alberta Stockmen On Dominion Board

John Wilson of Innisfail, and George R. Ball, of Strathcona, have been elected to represent Alberta on the directors of the Canadian Sheep Breeders' Association for 1928. It is announced as a result of the recent vote. Arthur J. Otwell, of Clover Bar, has also been named as Alberta director of the Canadian Swine Breeders Association.

Eclipses For 1928

In the year 1928 there will be five eclipses—three of the sun and two of the moon.
1. A total eclipse of the sun, May 10, not visible here. Visible to southern part of Africa, south Atlantic and Indian oceans.

2. A total eclipse of the moon, June 3, invisible here; the beginning visible generally in the western part of South America, the western part of North America, the Pacific ocean, Australia and the eastern border of Asia; the ending visible generally in the Pacific ocean, Australia and eastern part of Asia.
3. A partial eclipse of the sun, June 17, invisible here.
4. A partial eclipse of the sun, Nov. 27, invisible here.

5. A total eclipse of the moon, Nov. 27, visible here.
The beginning visible generally in the western and northern borders of Europe, the Atlantic ocean, North America, South America, the Pacific ocean and the northern part of Asia; the ending visible generally in North America, the northern part of South America, Pacific ocean, Australia and eastern part of Africa.

Joe Howse has returned from the "north" country.

Forks Christmas Concert

The weather being ideal, the Christmas concert at the Forks School, Monday night, December 19, was largely attended.
The school room was suitably decorated for the occasion. A magnificent tree reaching to the ceiling, and adorned with Christmas lights, balls, etc., made an instant appeal to everyone.

A well arranged programme, consisting of Christmas choruses, recitations, dialogues and tableaux by the pupils, a duet by Mrs. D. McKee and Mrs. R. Kruger, a solo by Mrs. F. Stapf, and a musical number by Messrs. Lydsman, Spang and Marshall, also an appropriate address by Mr. T. C. Rodgers was much appreciated by the audience.

While the last number, Christmas Stockings, was being staged, the noise of bells was heard in the distance. Soon, Santa Claus, a right jolly, plump old fellow in the person of Mr. Wick, appeared! He delightfully distributed the good things from the tree, bringing delight to every little heart.

A special treat of delicious pop-corn balls was generously donated by Mrs. D. McKee.
Mr. R. McDonald who has relinquished his position as teacher, was given a handsome pin and signed by the pupils.

A vote of thanks was tendered Mrs. D. Mack who had assisted in training the children.
After the programme a social hour was spent, during which time an opportunity was afforded of visiting the witches hour.

Refreshments were served. Then a short whist drive brought to a close a very enjoyable time. Miss L. Arthur and Mr. Foster captured the whist prizes.

Mr. R. McDonald on behalf of the pupils of the school wishes to take this opportunity of thanking Mr. Demarest for the Christmas tree, Mr. and Mrs. J. Munn for residing with the arrangements for the concert and also those who helped in the programme.

Mr. McClanahan is around again, after being confined to the house with a heavy cold.

We are agents for all music, authors and newspapers. Give your orders to the "Empress Express."

HARDWARE
Service with a Smile

Much Comedy Many Laughs In "Heaven on Earth"

"Heaven on Earth" contains the most spectacular war scenes ever photographed, with the possible exception of the "Big Parade." The war itself, however, does not play as important a role in the current production, though the climax is built up immeasurably by the presence of this episode.

Reine Adore brings all her piquant charm and vivid imagination to the role of the little gipsy who turns soldiers' entertainer during the war. Her emotions seem to come out of a true conviction of the role rather than a perfection of technique.

Conrad Nagel is seen opposite Miss Adore in the role of Edmond Durand, who rebels in the prison that his parents have built up about him, to live a life of his own choosing.

School Act Being Revised

Suggestions from any responsible quarter on the revision of the School Act, now in progress, will be welcomed by the Department of Education, announces Hon. Fern B. Ker, Minister of Education. Work in connection with the revision of the Act covering the operation of Alberta schools is now going forward and officials of the Department are anxious to have any communication on the subject sent in at as early a date as possible.

New Provincial Hospital Soon Ready for Use

The new hospital being established by the Provincial Department of Health for the treatment of patients from all parts of the province suffering from the after effects of infantile paralysis will be ready for use early in January, it is announced by Hon. Geo. Healey, Minister of Health. The new building is being erected by the Department of Public Works on the grounds of the University Hospital in Edmonton.

Builders

Isn't it strange that Princes and Kings And queens that tower in ancient rings, And common folk like you and me, Are Builders for Eternity? To each is given a lot of tools, A shapless mass and a book of rules; And each must make, ere life is flown, A stumbling block or a stepping stone.—Selected.

Next week's photoplay at the local theatre is a Paramount production entitled, "Tiptoes." Dorothy Gish is the star.

Form C Corrected Notice of Sale

Notice which appeared in the August 16, 1927, issue of the Gazette, Vol. 23, is corrected to read as follows: The notice is hereby given under Section 180 of the Domestic Animals Act (Manitoba) that, One Light Bay Gelding, young, weight about 1500 lbs., long legs white to hock, front, white to fetlock, blaze in face, white under lip, branded on right shoulder, appears to be, a

was impounded in the pound kept by Jos. Radford, Empress, Alta., located on S.W. 31, P. 24, Reg. 1, west of the 4th Mer. on the 8th day of July, 1927, and that the said animal was sold on the 22nd day of July, 1927, to Thos. Cruick, of Empress, Alberta, and that the said animal may be reclaimed by the owner, or on his behalf within a period of thirty days from the date of this notice at the Alberta Gazette, upon payment of all fees and costs due to the named party and the purchaser of said animal. For information apply to the undersigned.
D. M. GRAHAM, Secretary-Treasurer, Municipal District of Assiniboia, No. 241, Post Office, Assiniboia, Alta.

Proceeding With Railroad Construction

Rapid progress is being made on the railroad now, and the work laid out for this year will soon be completed.
The steel on the new railway will now be laid fast. A "pioncer" track-laying machine and one hundred and twenty-five men are now on the job.
Rosemary News Bessano Mail.

Woman Turkey Raiser

Dec. 10, '28—Alberta claims to have the world's champion woman raiser of turkeys. She is Mrs. M. A. Freeman, of the Beau Desire ranch at Ardenade, near here. Mrs. Freeman was five turkeys in a raffle eight years ago and entered upon the raising as a commercial enterprise. Today she has more than 800 head of bronze turkeys. Of these she is selling 500 head for the table and another 200 for her own ranch. Mrs. Freeman expects to clear up \$3000 on her venture this year and will raise as many more next year. She has no trouble in marketing her birds.

Miss Winnie Rowles left for Saskatoon, Tuesday, to resume her studies at the university.

The Lard River district in the extreme north of British Columbia can produce excellent crops of grain and vegetables. It is stated by the Department of Agriculture in British Columbia, following experiments made in conjunction with the Royal Canadian Mounted Police, specimens of grain have been received here.

Ocean tonnage to carry 30,000,000 bushels of Western Canadian wheat via the Pacific to the United Kingdom and Europe has been booked for November, December and January. During December alone tonnage for 20,000,000 bushels has been booked and shipping schedules for "hardened vessels" will be required for this.

"Faded Gold" will be a novel form of the Royal and Ancient game to be introduced this winter at the Chateau Frontenac, Quebec City, for the enjoyment of the winter sports tourists. The game will be played on skis and snowshoes, and over a course laid in the snow. Targets will replace holes and balls and arrows will take the place of golf clubs and balls.

The Poultry Department of the University of British Columbia announced the sale of a white Leghorn hen for \$200. She is not a famous hen No. 6, but F. 319 and was exhibited at Ottawa and at the 1927 annual. Last year she laid 335 eggs in 300 days, and in the weight just four pounds her purchase price was \$125 per lb. P. A. Sansome, of Greenwich, Conn., was the purchaser.

The Government's final crop estimate is now: Wheat, 44,500,000 bushels, as compared with an estimate of 45,000,000 in September and last year's actual yield of 40,000,000; oats 42,000,000 bushels as against September's estimate of 50,000,000 and last year's actual yield of 38,000,000. Barley is put at 25,000,000 bushels as against 20,000,000 last year and 14,000,000 bushels against 12,000,000 last year.

The fourth of the five new freighters being built for the Canadian Pacific Steamship was launched recently at the yards of Barclay, Currie & Co., Glasgow. The S.S. "Albatross" will make her maiden voyage from Glasgow to Salt Lake City on March 10, 1928. With her four engine ships the Beaverhill, the "Albatross" will make her maiden voyage to London, Hamburg, Liverpool and Antwerp. She will be a "caterpillar" vessel with a speed of 14 knots and is built to the highest class of Lloyd's specifications.

Agricultural Engineering In Short Course Program

Part of the agricultural short course to be held at the University of Alberta from January 24 to February 3, will be devoted to a discussion of the problems of agricultural engineering, including consideration of farm buildings, power farming problems, and various forms and types of farm machinery, paying special attention to plows and binders.

The Intention

The Cathedral had been gayly decorated for the Christmas services and two Irishmen were visiting it. One was from the country, and had been taken there by his friend who wished him to be duly impressed by its grandeur. As the visitors stood the resident of the city said, "Well, Mike, and phwat do you think of it? Isn't it grand?" "Put," said the one from the country, "it betes the devil!" "Put," said his friend, "was the intention?"

Canada's Indian Population Now Mostly Self-Supporting And Is No Longer a Liability

A widespread belief that the Indian population of Canada is decreasing is an error, as there are 101,241 in the Dominion and official records show little variation from decade to decade. Incidentally the total number of Eskimos in Canada is 6,763.

Although there are no millionaires among the "redskins," the Federal Department of Indian Affairs here holds \$12,500,000 in trust for them. This huge sum is derived from the sale of lands, timber and other resources.

Tom Longboat, the famous copper-colored marathon runner, Dr. Oronyashela, founder of the Independent Order of Foresters, and Paul Johnson, Canada's late "Gilded Indian" poet, were probably the most famous descendants of the first inhabitants of Canada.

While these three were outstanding in their particular fields, it remained for 4,000 young braves to bring further glory to their tribes while serving in France with the Canadian Corps.

A majority of the Indians of Canada are Christians, and among them, 6,146 who cling to their aboriginal beliefs. Religiously they divide as follows: Anglicans, 25,537; Baptists, 1,172; Methodists, 15,950; Presbyterians, 1,237; Catholics, 18,571; and other Christian beliefs, 1,527.

The Indian is very law-abiding, even when he gets a "kick" of "fire-water," which has the effect of restoring him to the primitive. Incidentally, it is a branch of the law for an Indian to have liquor, and persons selling it to him are heavily punished.

The Indians of Canada are self-supporting. The young braves today are abandoning hunting and fishing for agriculture through the efforts of the Department of Indian Affairs in its educational program.

Canada's Indians realized nearly \$5,000,000 last year from farm produce. The blunders and trappers received \$2,215,542 while those who raised or raised earned \$2,416,470. Only in the northern and outlying districts of the Dominion is the average depending on hunting and fishing for its livelihood.

The ancient tribal customs of the Redskins are slowly vanishing out. Western Indians still enjoy their dances, but any dance which entails mutilation of bodies or mutilation of property is strictly forbidden and shunned out.

War paint, tomahawks and the old time regalia of the braves are worn on state occasions, when a Royal Prince or Governor-General is made an honorary chief of a tribe or when an illustrious visitor is the guest of the tribe.

While tuberculosis still continues to be the chief menace to the health of the Indians of Canada, the population has not decreased in large numbers, due perhaps to the large families. The survival of the fittest was long the law of the Redskins, but today the square is learning to go to a hospital when a member is unable to continue his life in the eastern provinces. In the west the brave can acquire citizenship—thus he ceases to be an Indian and is no longer protected or restricted. Education among the Indians is on the increase as the total enrollment at 247 Indian schools is more than 10,000.

Above all, the Indian is not a liability to Canada, and it is predicted will more than take his place in his native land.

Not Hard To Solve

"Who Paid For The Advertising?"

No Puzzle At All!
Two non-advertisers manufactured practically the same kind of rat traps, costing 15 cents each, which were sold to the trade at 20 cents, the purchaser paying 25 cents.

One of the producers decided to advertise. His increased sales enabled him to make the traps for 40 cents each. He then sold them to the trade for 15 cents. The purchaser bought them at 25 cents.

Who paid for the advertising?
Not the maker of the rat traps because he made more money by selling more traps. Not the retailer, for he made the same profit on his sales. Not the purchaser, because he bought for five cents less.

Who paid for the advertising?
Wife: "Every time you get a pretty girl, you forget you're married."
Hobbs: "You're wrong, dear. Nothing brings home to me more forcibly."

W. N. C. 1907

Has Proved a Success

New Anti-Serif Rat Superior To Any Yet Possessed By Medical Profession

The success of a new anti-serif "mouse" non-poisonous and non-irritant even to the most delicate membrane," was described by Sir Alfred Mond at a luncheon in London.

Sir Alfred related the discovery by a chemist in the South Staffordshire laboratory of the Mond Gas Company after years of research. The discovery was a real rat product of exceptional anti-septic properties, he said.

After distribution to medical men, he said, the producers were gratified to receive thousands of doctors' letters telling of successful results from the application of what Sir Alfred described as a first-class chemical discovery.

All of the evidence appeared to establish, Sir Alfred said, that his firm was now in a position to place in the armory of the medical profession a new anti-septic weapon far superior to any it has ever yet possessed.

Would Find Times Affect Automobiles

Difficult Now For People To Get Along Without It

The extent to which the automobile in its double function of utility and luxury, has affected American society economically and industrially is amazing. If one regards it from almost any point of view, its rapid has been the change that the community has by no means been able to adjust itself to. It will be years before the highway is reconstructed to meet conditions and they never can be made fully to meet them. As for the effect on retail business, not even yet has the trend become clear. Socially, of course, as in recreation, the effect of the automobile has been profound, but on the whole American life in many phases is still in a transition period. Not the least interesting subject, in case the country should have a severe drought, would be the effect on the automobile.

New Rules Given House Of Commons

Speeches Except in Specified Instances Are Limited To Forty Minutes

Canada's House of Commons will function under new parliamentary rules at the coming session.

The changes, viewed with approval in political circles, will present a marked change from the old order of procedure. Limitation of speeches of members to 40 minutes is probably one of the leading features of the new rules.

This limitation, though, does not include the prime minister or leader of the opposition. Neither does it affect a cabinet minister making a government order nor a member making a motion of "non-confidence" in the government and a minister replying thereon.

All night sittings will be also a thing of the past. Under the new rules the House must adjourn not later than 11 o'clock on any evening it may be in session. On Wednesday evenings adjournment will take place at six o'clock.

Parliamentary appeals are also affected under the new procedure. Every parliamentary appeal must pay a seasonal fee of \$25 and may conduct proceedings before the House of Commons or its committees only with the consent and authority of the Speaker.

Under the new rules all parliamentary agents to be kept by the clerk of private bills and a copy filed with the clerk of the court.

Says Evolution Continuous

Man Only Stopping Stone, Opinion Of Montreal Minister

"If I doubt if humanity is the final step in evolution on earth," said Rev. Lawrence Clark, of the Church of the Good Shepherd, Montreal, speaking at Ottawa recently.

Mr. Clark, who traced the evolution of life from the simplest stages, where the earth was young up to the present time, declared his belief in the theory that evolution was continuous and would never stop.

"Man," he said, "may be a stepping stone to something higher in the scale of life. There is no reason to suppose that he is the final effort of the great forces which have been working throughout the ages until they have produced him."

Health Education Pays

Constant education in matters of hygiene and sanitation, along with the increasing advance of medical science, has almost completely wiped out of our civilization the plague, cholera, typhoid, diphtheria, and other diseases. Likewise, by careful living and preventive measures, we are building up greater individual resistance to disease.

There are cigarettes now that will stop coughs, help the singing voice and make one feel happy and content, but we are not going to rest our heads on the pillow of the past. The new market that will sell hair from falling out.

New Zealand is considering the conserving of its forests by importing substitutes for its many native building materials.

Miss Margaret Irving, the only woman tea-stater in Great Britain, tastes three hundred samples of tea every day.

Of Interest To Canadians

Dictionary Of National Biography Contains That Of Sir Wilfrid Laurier

That monumental classic, the Dictionary of National Biography, upon the founding of which the noted biographer George Smith expended his whole life and fortune, was enriched recently by a 600-page supplementary volume embracing the years 1912-13.

Among the biographies of special interest to Canadians is that of Sir Wilfrid Laurier.

Next in importance perhaps comes the story of the Canadian statesman, written by Prof. Wm. S. Dewart, Murray Wright, vice-president of Magdalen College, Oxford University.

Prof. W. L. Grant, principal of Upper Canada College, is responsible for the biography of Sir Charles Tupper, the last prime minister of the Dominion, who he describes Sir Charles, one of the Fathers of Confederation, as "perhaps the most fearless and constructive statesman whom Canada has produced."

Prof. Grant has also written about General Sir Sam. Hughes, whom he handles judiciously. After noting Sir Sam's fiery energy at the opening of the war, he writes of his later years.

"He was responsible for arming the Canadian forces with the Ross rifle, which afterwards was replaced by the Lee-Enfield rifle. He was of splendid energy, had much personal charm, but was too undisciplined and impetuous to be an easy colleague, either political or military."

Handling Honey

Must Be Properly Stored Or It Will Soon Deteriorate

The cure of honey from the time it is taken from the bees and it is offered for sale is of the utmost importance, for if it is not harvested at the right time and properly stored it soon deteriorates. This kind of honey, when extracting, as described in a Bulletin on "Bees and Honey To Keep Them," is of the greatest importance. It is essential also to store the honey in a dry, cool place where there is no chance of its coming in contact with moisture. Honey readily absorbs moisture from a damp atmosphere and if stored in a damp place will be spoiled.

Cash money must be handled carefully to avoid breakage. It must be stored in a warm, dry room. It should be where the temperature varies considerably, it is likely to granulate.

Had No Airport Facilities

And People Of Ottawa Missed Seeing U.S. Druggist

The flight of the United States ship Los Angeles from Larchmont, N. Y., to Ottawa, with Sir Philipps Rens, British Secretary of State for Air, on board, was abandoned, because the Canadian capital lacks suitable airport facilities. Thus the people of Ottawa missed the opportunity of seeing a great dirigible, similar in type to the two now being built in Great Britain. Certainly the Los Angeles, having already touched the air at an apparently slow speed, with the sun shining on its torpedo-shaped metal hull, must be an impressive spectacle.

The value of a performing circus is limited at about two thousand dollars.

PLEASED TO MEET YOU!

"Pleased to meet you!" really meant something when Canada welcomed these young Englishmen to her broad shores. A few years ago potential recruits were photographed outside the Canadian National Railways station at Winnipeg, where they broke their journey to Vermilion, Alberta. The young men will study Canadian farming methods at the Alberta Government's agricultural farm at Vermilion, and when they get farms of their own they will be fully qualified to handle them. They are between sixteen and twenty years of age, and some from all parts of England, most of them from farming stock—Canadian National Railways Photograph.

Indications Point To Belief That Hudson Straits Are Open To Navigation Longer Than Expected

Many Losses From Hail

Prairie Provinces Visited By Severe Storms This Year

Losses from hail in the Prairie Provinces are heavier this year than in any year since 1921 according to figures furnished by the secretary of the Canadian Hail Underwriters' Association. The heaviest storms were on July 10, July 20th, August 15th, 19th, and 16th. Between June 15th and September 14th, there were only two days (July 2nd and July 5th), when hail did not fall somewhere in the prairie provinces.

In Saskatchewan premiums amounted to about \$2,500,000, while losses totalled approximately \$2,600,000, an increase of more than \$1,000,000 being received in premiums by the 52 companies operating in the province. Of the 52 companies, 23 lost money on the year's operations, while 12 broke even, and the balance made a small margin of profit.

Only five of the 52 companies operating in Alberta made a profit while three broke about even on the year's business, the rest losing money. About \$2,600,000, against which the losses aggregated approximately \$1,100,000, the balance of the year was favorable, premiums totalled \$175,000 and losses about \$175,000, said Mr. Campbell, the secretary of the association.

Manitoba's experience was favorable, premiums totalled \$175,000 and losses about \$175,000, said Mr. Campbell, the secretary of the association.

A Quaker's Pose

Whittier Had Clever Way To Outwit Sightseers

Like Tennyson, John Greenleaf Whittier, America's Quaker poet, and an equally keen distaste for mere sightseers. Once two women, searching in Amherst for his house, stepped into a grocery store to inquire their way. The shop assistant, with an odd smile, directed them; but one, who had noticed the smile, asked if he thought the poet would use their clothes in a quaking manner, with all hands. "He simply must! We won't go away till he does. There are over so many things we want to ask him."

The assistant glanced towards a shadowy corner, where a number of customers, in men, were gathered, while the fashion, round a tall, scarred, stone to a barrel. They had all been talking politics, but had ceased at the woman's question. "Think he will see them?" asked the assistant. "Well," replied the man on the barrel, "I think Greenleaf does not find it easy to refuse a lady. I think perhaps he will—if he is at home." But when the two elusive women called, needless to say "Greenleaf" was not at home. He was still contentedly sitting on the barrel, talking politics.

Dairy Factories In Canada

A report recently issued by the Canadian Government Bureau of Statistics shows that in 1924 there were 2,074 dairy factories in Canada, an increase over the preceding year of 100. The increase was due to the fact that in 1924 there were 1,974 of the 2,074 factories in 1923 were creameries, 1,411 cheese factories, 250 combined butter and cheese factories and 25 condensers.

The opening week of November

finds the Hudson Straits without a vestige of ice in sight, and with a continuous fog, says an Ottawa report dated Nov. 7. Each day the marine experts of the department of marine and fisheries, at Ottawa, are more astounded as the data reports from the fliers who are patrolling the 450 mile stretch of the straits in airplanes every day declare that there is, as yet, no obstacle whatever to navigation.

"It is really very remarkable," said one of them, "and we are very much puzzled. It begins to look as if the straits are open to navigation many weeks longer than anyone suspected. It may be, indeed, that the ice does not enter the straits until February. The how few usually starts drifting south in that month. Of course, it cannot be sure. All our precautions indeed about the straits have been disturbed."

This official pointed out that the fact that there is as yet no ice in the straits indicates that in 1927, at any rate, the straits will be open much longer than in the St. Lawrence River, where the last ship clears about November 15. The straits are from 40 to 100 miles in width and it is inconceivable that if ice commenced to appear now, it could block the channel in two weeks, or even a month.

The absence of fog, too, is a great surprise to the officials. Fog always occurs at this time of year on the St. Lawrence. In the last ten days several ships have cleared from Montreal and made the entire trip to the Atlantic ocean without being able to see further than a ship's length in any direction. These ships navigated by radio direction and avoided collisions by using their sirens. This feat has pleased the officials, that it probably affords an official statement will be issued.

Clean Bags Necessary For Potatoes

All Bags Should Be Washed Before Using

Experiments conducted under the direction of the Dominion Botanist, and described in his latest report, have shown that it is imperative that all sacks used as containers for potatoes should be thoroughly washed before using. In order to ensure complete removal of insect substances clinging to their inner surfaces. Potato shippers often put up their stock in bags which have previously contained certain insects, fungi, or other pests, and it is astonishing how many of these commodities have an injurious effect on potatoes. For example, such commodities as tea, coffee, and cocoa, potato starch, corn meal, and bran, which do not in themselves injure the tubers, by virtue of their power to retain moisture induce an enlargement of the tubercles and also provide admirable media for the development of rot-producing organisms. Such chemicals as Epsom Salts, sodium nitrate, potassium nitrate, and common salt have a particularly injurious effect on potatoes, especially where damp storage prevails. The use of new sacks will, of course, absolutely preclude injury from this source. The report of the Dominion Botanist may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Lesson Was Hard

The word was a long while learning the way to play the game together, but the great mass of humanity had little property, little leisure and hardly any other until the method of the operation was adopted. There is a lot of injustice and wrong left in the world still, but that exists merely where the ideals of the system have not been observed—Detroit News.

Half the garage equipment in

Trablin is from the United States.

Why have they arrested him?

"Because he left the inn so early."

"And they arrested him for that?"

"No. They are simply taking him into safe custody to prevent his wife from being hurt."

West Telling On Sound Lines

Conditions Improved During Last Fifteen Years Says Bank Of England Director

In an interview at Stratford, E. R. Peacock, Glasgow-born, English director of the C.P.R., and one of the big men in the financial world in England and Africa, said that the West appeared to him to be developing on sound, sane lines. "It is 16 years since I was in the West," he said, "and then I was very much pleased with what I saw. Every place was booming, and it was useless to tell people that it would not last, and that the prosperity was false. And farmers were taking all they could out of the land and making no attempt to put anything back. But to day there are signs on every hand that the people are going about their work as they would in any other sound returns in the future, and there is no longer the burning desire to grow rich quickly in some light speculative way."

"And the farmers are treating the land with more respect and are showing by the way they are working, that they are laying out their homes that they intend to make it their life's work. Sixteen years have seen a wonderful and healthy change."

Visiting the University Mr. Peacock came away satisfied that he had seen one of the most interesting of persons he had had experience for a long time. A great contribution to the welfare of the country is being made, he said, by the agricultural colleges in its development of good breeds of stock and poultry, while its efforts to show students of rural life as the cultivation of free science applied to him as long much to take the crabs out of country life.

"On my trip through the West," he remarked, "I have been most favorably impressed by nothing the great increase in cattle herds and also by the presence of free schools around farm houses. In the old days no effort was made in that direction and the result was that there were no rural schools anywhere close to the farms, the farm people anything but drudge, very without any bright spots."

Should Teach Both Sides

One-sided Histories In U.S. Schools Are Bad For Students

The Bishop of London took occasion when addressing a large number of American Legionnaires, to point out that history as taught in the British is still being taught in the United States. Most of us who have read American schoolbooks must agree with the Bishop. The practice is dwindling and there is a strong movement for truthful history for students; to tell them what really happened instead of a one-sided, highly partial account. The writer had such an experience. At Quebec, he was telling an American visitor the story of the battle and the part taken by General Brock. He was told that the story was not told that way in his history books. The world has progressed far enough for truthful histories. Histories with one side glorified and the other diminished in every way, make dull reading. The interesting history books are those in which the truth is told and the facts taken made on both sides pointed out.

To Set Things Right

Chicago's Mayor Offers Prize For All-American History

Mayor Thompson's slogan, "America First," has been given new impetus with the announcement of a \$10,000 prize for a new all-American history text to be used in the Chicago public schools. The prize has been offered to the author of a "new history which will tell the truth." The Mayor has announced that the award will be paid by the America First Foundation to the author whose history is recommended by a committee of competent educators and judges.

Christian B. Paschen, treasurer of the foundation, is the donor of the \$10,000 prize.

Thurs.—"Did it make you angry when he suggested that you take a street car?"

Doris—"It was so mad I could have hit him in the face! And in fact, I did."

Clark—"You'll find shoving even more economical in the long run."

MacTavish—"You're economical! Man, how if you get it back in the tube when you happen to squeeze out too much?"

W. N. U. 1707

Take All Methods Of Control Not Yet Fully Understood

Take-all is a fungus disease which attacks wheat in different parts of Western Canada. It appears to be confined mainly to semi-wild districts, although it has been found on wheat on open prairie. It affects barley and rye slightly and attacks a number of native grasses quite severely, but it is most important as a disease of wheat. The disease is most evident just after the grain is headed out. It often appears in almost clear, clear patches, varying from a few feet to several yards in diameter. Nearly every plant in such patches is considerably stunted and often the plants are quite bleached in appearance.

Methods of control of this disease have not yet been completely worked out but some suggestions are given in a new pamphlet entitled "Take-all, a Destructive Disease of Wheat," published by the Agricultural Branch, Department of Agriculture, Ottawa. In districts where take-all is prevalent it would probably be wise to alternate the crops, to avoid growing wheat continuously on the land for the first few years after it is broken. During the stubble in early autumn a good sowing of clover or alfalfa over the stubble, if there are only a few patches on the field it is worth while to spread straw over them and burn it.

In fields where the disease is established, a rotation such as the following is recommended: 1st year, any cereal (excepted to winter 1921); 2nd year, winter rye; 3rd year, oats. One cycle of this rotation would probably make it safe to apply a standard rotation containing a proportion of wheat.

Ornamental Conifers

Make Splendid Hedges and Are Valuable As Windbreaks

For nearly forty years tests of many species and varieties of ornamental trees and shrubs have been conducted at the Central Experimental Farm. Summing up the experience of these years, the Division of Horticulture has just issued a bulletin (titled "Ornamental Trees, Shrubs and Woody Climbers") which gives in compact form, for any person who wishes to plant his grounds, descriptive lists of the best plants to use. One section of the bulletin deals with the ornamental trees. It contains many beautiful native species of these trees in Canada, but their very small interest precludes their use when the cultivation of trees is being considered. Yet no trees are more successful in taking away much of the weakness of the winter landscape. Some of the best hedges are made of evergreen conifers, and they help to soften the hard lines about a residence which many winter winds do much to emphasize when there are no evergreens. The conifers, too, are very important in the landscape, their value for this purpose being most appreciated in the Prairie Provinces. A long list of conifers are described in the bulletin which is available at the Publications Branch, Department of Agriculture, Ottawa.

Justice Demands An Eternity

Life Without a Hereafter Would Be Only Game Of Tacticians

In that old-time poem that describes the battle of Blenheim, when the little Peterkin climbs on the knee of Roger and listens to the thrilling story of brave fighting and sanguinary sacrifice, the little chap interrupts the narrator and asks, "What good came of it?" Is it a far cry from this to William James, who writes, "If this life be not a real thing, in which we are to win or lose, or for the universe by success, it is no better than a game of private theatricals from which one may withdraw at will. But it feels like a real thing!" Those who make so brave a fight here against heavy odds desire a freer and fuller opportunity to utilize their gifts and talents, and to exercise their powers for the good and justice demands that they shall have it.

Mrs. Peck—"You emphasize! You needn't look so innocent! Oh, I know what you did!"

Peck—"But my dear, I don't."

Mrs. Peck—"Don't you, you know? Well, then, I'll tell you you bought a clear with the cartage I gave you this morning and walked to work!"

Alfalfa growers are warned to be on guard against the fall army worm, or grass worm. Agricultural advisers farmers to watch especially all alfalfa sown in August and September for an outbreak of this pest.

New Roomer—"But where can I put my wardrobe?"

Landlady—"Why not just hang it over the back of the chair until morning?"

Change Favorable For Eskimos

Control By Commissioner Of North West Territories Best Says Captain Munn

The order-in-council transferring the care of the Eskimos in the far North from the Department of Indian Affairs to the Commissioner of the North West Territories was characterized as a "commendable step in the right direction" by Captain Henry T. Munn, F.R.G.S., Arctic traveler and explorer, one of the greatest living authorities on the Eskimos themselves, in an interview at Ottawa. While man's food, white man's clothing and white man's customs, according to Captain Munn, are detrimental to the Eskimo population of the far North. Foods imported by traders, Captain Munn contended, have not sufficient caloric value to support the Eskimo in their natural habitat and those who wear white dress and easy clothes to every epidemic that comes along.

From personal observation, Captain Munn stated, that those who eat as their fathers did, maintain a high resistance to the rigorous cold and epidemic diseases which are now threatening the wild life of the far North was urged by Captain Munn as the only method of preventing the further extinction of the Eskimos.

"It would seem," Captain Munn added, "the time is approaching when the question of the Eskimos, who are now being exterminated, will come before the attention of Parliament."

He was adopted by Canada of a form of administration based on that of the Eskimos in Greenland.

Will Repair Dome Of Ancient Church

Earthquake Last July Damaged Historic Building In Jerusalem

The dome of the Orthodox portion of the Church of the Holy Sepulchre, which was cracked by the last earthquake, has been condemned by the local police department, and it will be reconstructed. The earthquake occurred last July.

The Church of the Holy Sepulchre was constructed in 325 A.D., early records show. The dome is supported by a gilded cross. The church stands over the generally accepted site of the tomb of Christ. The church was burned in 1868, and restored in 1870. The dome was restored by architects of various nationalities.

Questionable Luck

"My sister is awfully lucky," said one little boy to another.

"Why?"

"She went to a party last night where they played a game in which the men either had to kiss a girl or a wolf, or have a box of chocolates."

"Well, how was your sister lucky?"

"She came home with 13 boxes of chocolates."

The rarest of all commercial products is radium.

Landlord—"You'll like this apartment. It's even fitted with rubber slippers."

John—"Plastered with rubber? What's the idea?"

Landlord—"So nobody will get hurt when it falls down."

Playing Safe With Mushrooms

Must Be Able To Distinguish Edible Fungi From Poisonous

Mushrooms make a delicious diet and much has been written in recent years on their value as a food. Many persons at present are able to go into the woods and gather them with confidence, thus experiencing the pleasure of hunting for them and at the same time adding a pleasant variation to their diet. Many others would for their example if they were sure of being able to distinguish poisonous fungi from the edible species. The consequences of a mistake are no very serious that it is utter folly for anyone to gather and eat mushrooms unless absolutely certain that the kinds picked are wholesome.

Recognizing the widespread interest in this subject, the Dominion Department of Agriculture has just published a comprehensive volume entitled "Mushrooms and Toadstools," written by H. T. Gossow, Dominion Botanist, and W. S. Odell, the authors point out in their introduction that the knowledge of fungi is the only safe means of distinguishing edible fungi and poisonous, and that all so-called "cures" are false and superstitious nonsense. The popular claim that a silver spoon or dish dipped into a dish of cooked fungi will turn black if it contains poisonous ones, is entirely without foundation. Other tests are equally fallible. The first command must for mushroom gatherers is: "Eat no fungus of any kind unknown to you. Assume not the slightest risk, and make sure that all specimens collected are safe to eat." How to obtain this certainty is simply and clearly told in the book which will enable the reader to distinguish between mushrooms from good ones, and deadly mushrooms from harmless ones. The volume, which is well bound and splendidly illustrated is just as the King's Printer, Ottawa, at a nominal price of one dollar.

Atabaska Salmon Trout

New Industry Has Been Established

A large supply of salmon trout from Lake Atabaska to Chicago recently marked the beginning of a new industry in Alberta. The Lake Atabaska Fisheries, Limited, has gone into the business of supplying the markets of the United States, principally Chicago and New York, with the popular product. Already a large plant and low houses with dwellings sufficient to house 50 employees have been erected.

Means Heavy Loss

Chicago Hotel Manager Says 20,000 Towels Disappear Every Month

This is the mystery of the missing towels. They disappear from Chicago's larger hotels at the rate of 20,000 a month, according to the statement of a well-known hotel manager, and he wants to know what becomes of the missing towels. "We figure that we lose one towel a month for each room," he said, "and I understand that is about the average for other leading hotels. That means that approximately a quarter of a million towels fade from sight every month. This includes hand towels, bath towels, linen towels, Turkish towels, and all the other towels required in equipping a public hotel. It takes no account of the stacks that are worn out."

"It used to be that hotel spoons were the proper souvenir, but it is now seen to be the towel. Yet, of course, can't question towels too closely, and the proprietors we find one who do not permit them rather than packing towels into the hands of guests, and by mistake. If we are dead some of it, of course the person who handles them according to Hays and the towels recovered."

"The traffic in towels has developed some peculiar angles. People do not take towels home, but they leave them from hotels in their hands. I heard of one hotel that found them some years ago, after the Dempsey-Tenney crowd had gone, towels from four different states. The guest had left more than he had taken away."

Hotels now maintain a sort of inventory towel exchange."

The Danger Of Electricity

Universal Use Has Tendency To Make People Careless

The use of electricity has become so common that familiarity has bred contempt, and its dangers are ignored. If, however, with, may not be apprehended in the measure they should be. In pointing out the dangers of electricity, in "playing" with it, attention is called to the handyman around the house, who mends this and that appliance or connects the wires for a little light or convenience outlet, who often gets what he laughs off as "a little poke." Often he believes that he did not suffer much from shock because of low voltage, and that opinion leads him to fresh danger.

The fact of it is that electricity at 110 volts is certain death if you are properly in contact when you get it. If you are firmly in touch with the ground, or if you are in a bathtub, or touching plumbing, your electric stove, or any metal communicating with the ground, in touching solutions or metal to knock you out and very likely to kill.

Mention is made of bathroom lighting caused by the use of a bathtub for a defective brass socket lighting fixture. Or again, attempting to deflect the heat of a portable electric heater. In such solutions extra lessons for any electric service the good advice is proffered that the family physician never be trusted unless it is certain that he is thoroughly familiar with the standard methods approved by the fire underwriters and electrician societies. Do not install a light or outlet that will work quite well and that eventually may kill himself or some of the family and burn the house.

To be forewarned is to be forearmed. The dangers seen in the foregoing are the dangers of electricity, passing on for the benefit of all users of electricity.

Berlin Firm Completes Novel Automobile

Front Is Life-Like Representation Of A Real Tiger

A Berlin motor car firm has just completed for India a novel vehicle, a motor car with a tiger's head as a front end. The car is a life-like representation of a tiger with wide-open jaws. The headlights gleam through the eyes which are of glass.

When the car is in motion it looks as if a Bengal tiger is leaping through space.

Car newsmen are making merry over this innovation. It has carried over the papers, to have cars built according to its characteristic fangs?

With the intent of winning, for instance, have a Ford Jaguar, and Africa a Rolls Royce Lion.

Similarly Grand might have a tiger's head, a Kangaroo, China a dragon with seven heads, Russia a bear, Spain, a bull, and Switzerland, the home of condensed milk and Emmentaler cheese, a cow.

The prospect opens up a bright vista for the taxidermist. The association of the animal world with the automobile industry has long been a commonplace if only in nomenclature.

It seems the car world is going a step further and will be raising the zoo for motor-bodies. The results up on timid pedestrians, especially when they have a tiger's head in front, so well, are awful to contemplate.

A herd of ferocious lions and tigers crossing through the streets at twenty miles an hour with gleaming eyes would be enough to fill the mercantile with heart-failure casualties.

Carelessness A Bad Habit Italy's famous racing tower at Pula is being a little harder. Scientists fear it will fall and are devising ways to save it. For centuries the tower has stood as a monument to a year in the last nine years the lake has increased. It's like a bubble of life. We grow just a little carlier perhaps a million years a year, but some day the tide increases and the fall is near.

The zebra is born with stripes but man must acquire them.

"Take a few steps backward, dear mother-in-law, and you will get a firm view!"—Montquie, Chatterbox

Weight Guesser: "Madame, I guess your weight is about 150."

Pat Young: "You wonderful man!"

Weight Guesser: "—on one side, and 150 on the other."

Pat Young: "You unappealing wretch!"

The trouble is that too many people confuse free speech and cheap talk.

R. S. Sexton Proprietors A. Macklin

Thursday, Jan. 5, 1928

The holiday season passed
over very quietly.

Mr. and Mrs. Wm. Rowles
are taking a holiday at Victoria,
B.C.

Mrs. W. Pullin and grand-
daughter, Dorothy, are visitors
in Moose Jaw.

Orrill Ellis, left this morning
for London, Ont. and points
east.

It is expected that a very
large attendance will be present
at the C.P.R. employees dance
tonight.

Tom Wallace made a trip to
Jasper, this week. He reports
conditions as somewhat there.

The local curling club com-
menced a "double knock-out"
schedule Wednesday evening.

Mr. and Mrs. C. W. Dawdy,
are visiting at the home of Mr.
and Mrs. B. L. Dawdy, in Cal-
gary.

In the Christmas tree pro-
gram published last week the
team, Cameron McCune and
Gennie Milne, due, was pub-
lished. It should have read
Cameron and Gennie McCune.

Mr. Lyon, father of Mrs. C. R.
Moore, who has been visiting
with his daughter here, left for
the Coast on Thursday morn-
ing.

Mr. York arrived in town on
Wednesday 23. On the morning
of the 24th, he accompanied his
parents, Mr. and Mrs. A. York,
to Hasano for the celebration
of their golden wedding at the
home of their daughter, Mrs.
W. S. Weir.

The local public and high
schools recommenced their
terms, Tuesday. Mr. Maxwell
resumed his position as teacher
of the intermediate grades.

Bill Pullin has commenced
his annual job of "putting up"
ice.

Pete Spaanen, of Bindloos,
was a visitor to town over
Wednesday night.

Harry Jackson left for Le-
due, Alta, Tuesday, on a visit
to Mr. and Mrs. Tom Jablon-
ski.

Harold Boyd, returned to
Saskatoon, Tuesday, to resume
his studies at collegiate school.
Allan VanCleave resumed his
studies at university.

"Heaven on Earth" showing
at the theatre this week, is a
French war comedy. A photo-
play story that is somewhat dif-
ferent to the general run of
film stories.

The holiday season saw no
abatement of the severe cold
weather, the thermometers
registering from 20 to 43 de-
grees below. Winds from
W. N. W. being present.

W. S. Weir has rented a farm
three miles north of Make-
peace, and with his family will
move there in the Spring—
Mail, Bassano.

The monthly meeting of the
Castle Combe W.M.S. will be
held at the home of Mrs. Fer-
guson, on Wednesday, January
11th at 2 o'clock.

There is a little activity ap-
parent in regard to farm lands.
Undoubtedly this coming Spring
will see much more land brought
under cultivation in this
district.

Do Not Become Lax On Fire Precautions

During the festive season the
fire threat was active at many
points. It is perhaps not un-
wise to issue a warning at this
season that every household
should take every care to pre-
vent such calamity. After the
heavy fires which have been
necessary during the cold weath-
er we have been experiencing,
chimney flues are apt to be-
come foul with soot and danger
of fire increased. Also, as the
winter speeds on its way
we are apt to become less care-
ful and to take more risks than
is perhaps the case earlier in
the cold weather. However,
there should be no let up in
precautions. A little care may
save a mountain of sorrow.

Application For Beer Licence

Public notice is hereby given that
the undersigned intends applying to the Al-
berta Liquor Control Board for a licence
to sell beer by the glass or open bottle,
for consumption in connection with the
premises of the Government Liquor
Control Act of Alberta, and the regulations
made thereunder, with respect to
the following premises:
Lot 1, Block 10, Townsite of Bindloos,
Alb., and known as the Balmoral
Hotel.
Hotel at Empress, Alberta, this 14th
day of December, 1927. — Henry
McDonald, applicant.

The Days of Our Week

Sunday comes from "Sunnan-
dag," the Old English for Sun's
day.

Monday from "Monandag,"
the day in honor of the moon.
Tuesday gets its name from
Tyr, the god of battle.

Wednesday was named in
honor of Wodin, the all-father
and King of the gods.

Thor, the thunderer, claims

Thursday

Friday, gets its name from
Freia, the goddess of love.

Saturday, comes from Set-
ernes, or Saturn's day.

Man's Unseen Friends

Most of us do not realize the
part played in our lives by our
unseen friends. Among those
friends which work for us are bacteria. It is we not

for these minute creatures man
would not be able to live. Life
of all sorts would stop. What
would be the earth if it all the
countless things, animal
and plant should die and not
disappear through decay? It is
the disappearance through de-
cay which is caused by bacteria,
and it is this decay which re-
sults in the materials of which
these bodies are composed to
separate and unite with the
soil, enriching and nourishing
the plants which are put into it.
If it were not for bacteria, life
could not exist.

Now what do you know about
that?—Red Cross Magazine.

Express Cargo Steamers For C. P. R.

The fourth of the five 10,000 ton cargo steamers under construction in the
Old Country for the Atlantic service of the Canadian Pacific was launched
recently from the yards of Messrs. Barclay, Curle and Co., Glasgow. With
appropriate ceremonies and in the presence of a large gathering of Canadian
Pacific Officials, the new ship was christened the "Beaverhill" by Miss Mavis
Gillies, (niece) daughter of Captain James Gillies, general manager of the
Canadian Pacific Steamships Ltd.

When these new steamers are delivered, the Canadian Pacific cargo
fleet will be augmented by five of the highest type of express cargo steamers
and capable of maintaining a speed of 14 knots an hour, which is regarded as
exceptional for cargo steamers. The marked growth of ocean trade between
Great Britain and Canada via the St. Lawrence route, has prompted the
Canadian Pacific to augment their freight service to this extent. These vessels
will be used to maintain a weekly service between Canadian ports and those in
Great Britain and on the Continent.

The new freighter, like her sister ships the Beaverburn, Beavertide,
Beaverford and Beaverhine, is 550 feet in length 61 and a half feet in width
with a deadweight carrying capacity of approximately 10,000 tons and load
draft of 27 feet; but should a need arise as much as 12,000 tons may be carried
on the maximum load draft. The ships will be driven by twin screws.

The Heaven of Love--The Hell of War

Renee Adoree & Conrad Nagel

IN

"Heaven on Earth"

A Truly Great Film Romance

Heart-Beats mingle with the drum-beats of war. Amazing battle scenes! Paris gone
mad! A thousand other throbs and thrills! And through it all, the love of a man of
wealth for a gypsy maid, that defies both society's censure and the iron hand of war!
with Renee Adoree of "Big Parade" fame!

Admission, 50c and 35c Show commences at 8 p.m.
